

Senior Technical Designer
Central London
£60–70K + Package
Vacancy ID: 010169

You will be joining a respected London design and build contractor known for delivering workplace projects that consistently outperform expectations. Despite operating with a relatively compact team, the business regularly secures prestigious projects and delivers them to a very high standard.

The environment is collaborative and professional. Decisions are made quickly, people are trusted to do their work well, and technical expertise is genuinely valued.

For someone who enjoys being closely involved in the technical side of workplace projects while also having a voice in how schemes are delivered, this role offers a strong platform.

What You'll Do

You will take responsibility for the technical design stages of workplace design and build projects, ensuring the transition from concept to construction is smooth and well coordinated.

Your role will involve producing detailed drawing packages in AutoCAD and working closely with designers and project managers to develop technically sound solutions. You will help ensure that drawings are buildable, compliant and aligned with programme requirements.

You will review technical details, coordinate with consultants and resolve construction challenges as projects progress. Your involvement will often begin early in the design phase, helping shape solutions that balance creativity with practical delivery.

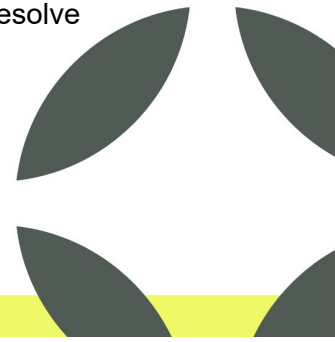

Within a close knit team, communication is open and direct. Your experience will help maintain quality and consistency across multiple projects.

What You'll Get

- A salary of £60,000 to £70,000 plus package
- The opportunity to work on high profile workplace projects that punch well above the company's size
- A close knit team environment where your contribution is visible and appreciated
- A professional, grown up culture built on trust and accountability
- A growing business where strong performers can naturally take on greater responsibility over time

What You'll Need

- Experience producing technical drawings using AutoCAD
- A background in workplace design and build projects
- A strong understanding of technical detailing and construction coordination
- Confidence working with designers, project managers and consultants to resolve

technical challenges

- Revit experience would be beneficial but is not essential, as the software is already available within the business

About the Company

You will be joining an established London based workplace design and build contractor with a strong reputation for quality delivery. The business has grown steadily through repeat clients and a consistent focus on delivering projects properly.

Although the team is relatively compact, the company regularly competes with much larger firms and delivers projects that reflect a high level of technical and design capability.

The culture is pragmatic, collaborative and professional. People are trusted to do their jobs well and are encouraged to contribute ideas that improve project outcomes.

Getting in Touch

"If this sounds like the right next step for you, call Thomas Wood on 07398 970 887 or email thomas@moonlightpartners.co.uk.
